SUMMARY

For a 22 years-old guy, I single-handedly created a close-to-complete POS for a multi-branch restaurant in Flutter Desktop for the client-end, Laravel and MySQL for the server side. I've also created the call-center managing software based on PBX phone system. I've also been managing a team of 2 other software developers one of which, with my mentoring, studied back-end development and successfully implemented several back-end features, helping accelerate the development pace.

SKILLS

PROGRAMMING LANGUAGE	**Experienced:** Dart | PHP **Familiar:** C++ | Java | Python | Assembly | Go
FRAMEWORKS & TOOLS	Git | CLI | GitLab | NodeJS | Flutter Framework | Linux | Windows | PhpStorm | Intellij Idea | Pycharm | Navicat | DataGrip | Postman | Plesk | cPanel | VMware ESXi & vSphere | NMAP | Laravel Framework | CodeIgniter Framework | IIS | bash scripting | Active Directory | PowerShell | Fleet Commander Admin | GNOME | MySQL SQL | MariaDB | MS Exchange | Restful APIs
SOFT SKILLS	Teamwork | Negotiating | Team Building | Collaboration | Lifelong learning | Self-Starter | Leadership | Humility

EXPERIENCE

MID-LEVEL FULL STACK ENGINEER
Trade Point BPM | Fayoum, Egypt

9/2020 - Present
Updated 6 MAY 2022

•Engineered a P.O.S and Restaurant Management System for a Multi-Branch Restaurant and Call-Center.

•Built a mini P.O.S System as a Loyalty System for Sunmi POS Machine with Flutter Framework.

•Installed a full Infrastructure (Servers & Switches') to Serve the P.O.S System and The Call Center.

•Remodeled a Messenger Bot and Integrated it with the internal P.O.S system instead of Google Sheets.

•Optimized cloud and local Servers Performance from Being a monolithic architecture to be a microservice architecture, by using VMware ESXI.

•Recruited and Headed two Junior back-end Developers.
